## MCF's Financial Information

MCF is required by law and its Trust Deed to meet certain financial requirements. This table shows how MCF is currently meeting those requirements. These are minimum requirements. Meeting them does not mean that MCF is safe. The section on specific risks in the PDS relating to MCF's creditworthiness sets out risk factors that could cause its financial position to deteriorate. The offer register provides a breakdown of how the figures in this table are calculated, as well as full financial statements.

### Key Ratios

Set out below are key ratios for MCF's most recent financial year as well as for the two preceding financial years. The ratios are calculated in accordance with the Deposit Takers (Credit Ratings, Capital Ratios, and Related Party Exposures) Regulations 2010 (the *Non-bank Deposit Taker Regulations*). A summary of MCF's calculations is set out in the Appendix.

#### a) Capital Ratios

Capital Ratio	31 March 2023	31 March 2022	31 March 2021
MCF's capital ratio calculated in accordance with the Non-bank Deposit Taker Regulations	13.09%	14.50%	12.75%
Minimum capital ratio MCF must maintain under the Trust Deed	12.0% <sup>1</sup>	12.0%	12.0%
Minimum capital ratio that must be included in the Trust Deed under the Non-bank Deposit Taker Regulations	12.0% <sup>1</sup>	12.0%	12.0%
Minimum capital ratio MCF must maintain under the Non-bank Deposit Takers (Credit Ratings Minimum Threshold) Exemption Notice 2016 <sup>2</sup>	12%	12%	12%

The capital ratio is a measure of the extent to which MCF is able to absorb losses without becoming insolvent. The lower the capital ratio, the fewer financial assets MCF has to absorb unexpected losses arising out of its business activities.

### Notes

- Under MCF's Trust Deed and the Non-bank Deposit Taker Regulations the minimum capital ratio in the Trust Deed must not be less than 8% if MCF has a credit rating. MCF obtained a credit rating on 21 July 2023. Accordingly, from 21 July 2023 onwards MCF must maintain a minimum ratio of at least 8%.
- As at 31 March 2023, this exemption notice exempted MCF, because when assessed on 1 October for the relevant measurement period it had average consolidated liabilities of \$20 million or more but less than \$40 million, from the requirement to have its creditworthiness assessed by an approved rating agency on the basis that it was unduly onerous for MCF to comply with the requirement to have a credit rating, provided MCF

maintained a capital ratio of at least 12%. MCF obtained a credit rating on 21 July 2023 and so is no longer relying on this exemption notice.

## b) Related Party Exposures

Related Party Exposures	31 March 2023	31 March 2022	31 March 2021
MCF's aggregate exposures to related parties	0.01%	0.04%	0.03%
Maximum limit on aggregate exposures to related parties that MCF must not exceed that is included in the Trust Deed	15%	15%	15%
Maximum limit on aggregate exposures to related parties that MCF must not exceed that must be included in the Trust Deed under the Non-bank Deposit Takers Regulations	15%	15%	15%

Related party exposures are financial exposures that MCF has to related parties. A related party is an entity that is related to MCF through common control or some other connection that may give the party influence over MCF (or MCF over the related party). These related parties include directors and shareholders of MCF and other companies or entities that the directors and shareholders have an interest in.

## c) Liquidity Requirements

Liquidity Requirements	31 March 2023	31 March 2022	31 March 2021
<b>Liquid assets to total liabilities ratio</b>	7.82%	9.09%	10.36%
<b>Minimum liquid assets to total liabilities ratio under the Trust Deed</b>	(i) 10% of Total Liabilities if the capital ratio is less than 11%; or (ii) 8.75% of Total Liabilities if the capital ratio is equal to or greater than 11% but less than 13%; or (iii) 7.5% of Total Liabilities if the capital ratio is equal to or greater than 13%.		
<b>Total mismatch calculations</b>	\$1,115,503	No deficit	No deficit
<b>Minimum liquid assets to cover any deficit between expected receipts and expected payments under the Trust Deed</b>	1) At least 110% of any deficit amount arising from: a) the aggregate amount receivable by the Charging Group in cash by way of principal and interest during the forthcoming financial quarter and the amount of any financial assets of the Charging		

	<p>Group that are at call or available on demand during the forthcoming financial quarter; less</p> <p>b) the aggregate of the total amount of cash payable against liabilities of the Charging Group during the forthcoming financial quarter (including but not limited to principal, interest, tax, operating expenses and capital commitments).</p>
--	---

Liquidity requirements help to ensure that MCF has sufficient realisable assets on hand to pay its debts as they become due in the ordinary course of business. Failure to comply with liquidity requirements may mean that MCF is unable to repay investors on time, and may indicate other financial problems in its business.
